

# Emplobot: disrupting HR landscape with AI tech

Think  
**BIG**  
GROW  
smarter

# The new wave of communication technology

HR tech evolution is induced by the rapid changes in the way people communicate

# Job market trends

Rapid tech evolution and sociographic changes significantly shape the labour market

**Talent war rage on**

**Automation & AI is becoming  
the new normal**

**Candidate-driven job market**

# Everything changes, so does the job market

Sourcing quality candidates is harder than ever

Candidates don't  
look for work

approx

**70-80%**

candidates are  
passive job seekers

Low conversion  
rate

only

**8.59%**

of career site visitors  
turn into applicants

Candidates  
feel ignored

**80%**

of job applicants have a  
feeling their application  
hasn't been verified at all

# There are plenty of candidates

You are just looking in the wrong place

**Facebook: 16 mln polish users**

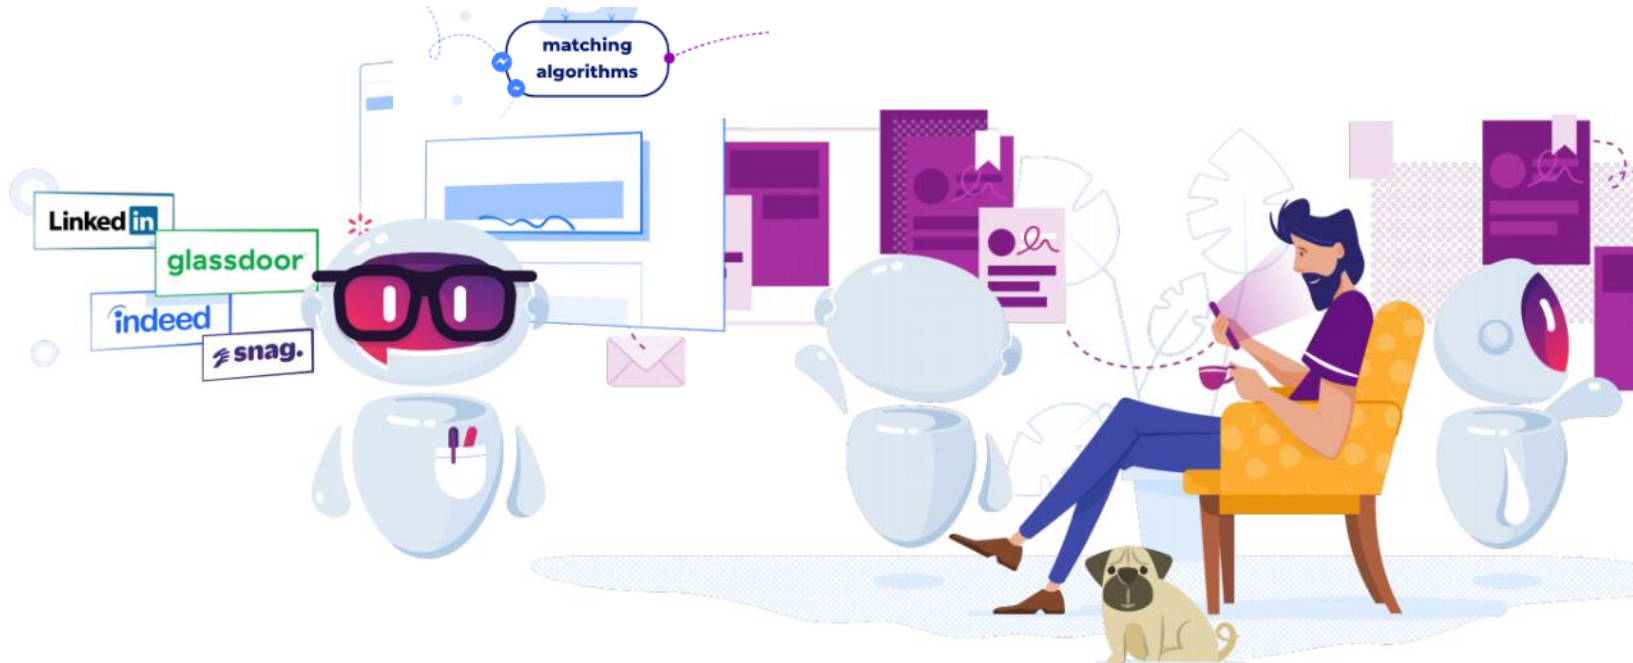

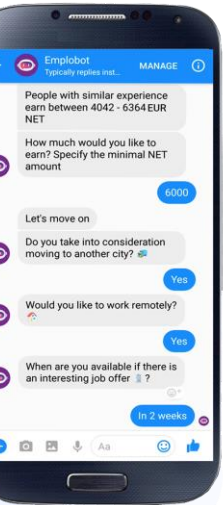

**Messenger: 12,8 polish users**

**~4 mln users**

# Solution: Emplobot

AI-based personal career assistant  
that **searches, applies and negotiates** offer **on behalf** of the candidate

# How does it work: 3 steps

**#1**

Our system uses online ads both to acquire candidates and to build brand awareness

**#2**

The bot applies (anonymously) on behalf of the candidate for matched jobs listed on job boards and career pages. Application is sent as a “blind CV”

**#3**

If an employer is interested in the offer the only thing he has to do is to click the link that onboards his company in the Emplobot system
