

We make computers understand humans

Language Cognitive Engine to automate work with text data and knowledge extraction

for high volume / high-cost processes

smabblar

Digital transformation

happens everywhere

In today's and tomorrow's business

information, context, and speed

are a competitive edge

Achilles heel of most organizations

Unstructured text data

disrupts process workflows

costs time, slows execution

lowers efficiency

The upcoming shift

Computers understanding text

Hyper-awareness

Informed decision-making

Fast execution

Smabblar Language Cognitive Engine

**fully liberates the knowledge potential of text data
for process and workflow automation**

Massive intelligent text processing

Automating text cognitive tasks

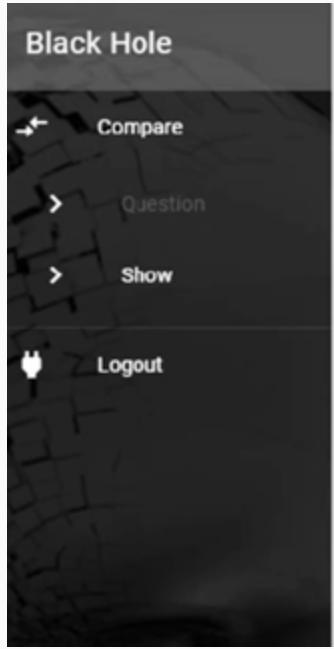

Digitilized knowledge

Language Cognitive Engine

to automate knowledge extraction

10. **Cost of things conditions**
If you or your spouse is not legally liable to drive following an accident that results in a valid claim under the policy we will, at our discretion, pay for the cost of a rehabilitation during course.
 11. **Vehicle no. disc cover**
We will pay an amount representing any unexpired part of your vehicle's no. disc calculated on a proportionate basis, **if you are** otherwise unable to recover the following a total loss under this policy.
 12. **Personal advertisement and signposting equipment**
In the event of a breakdown, personally damaged by you or your spouse.
The cover is 10. Personal
We will pay Full up to £10,000 for any vehicle.
If you come out to replace damaged.
Any amount 10. Doubtful.
If you or a pay up to £10,000 for any vehicle.
We will pay your vehicle.
You cannot 10. Personal
if cover for a 10. Personal
if the vehicle 10. Personal
When we pay 10. Personal
You may be 10. Personal

Query
Which insurance will cover my loss if my pet llama eats my wallet?

ANSWERS

AXA

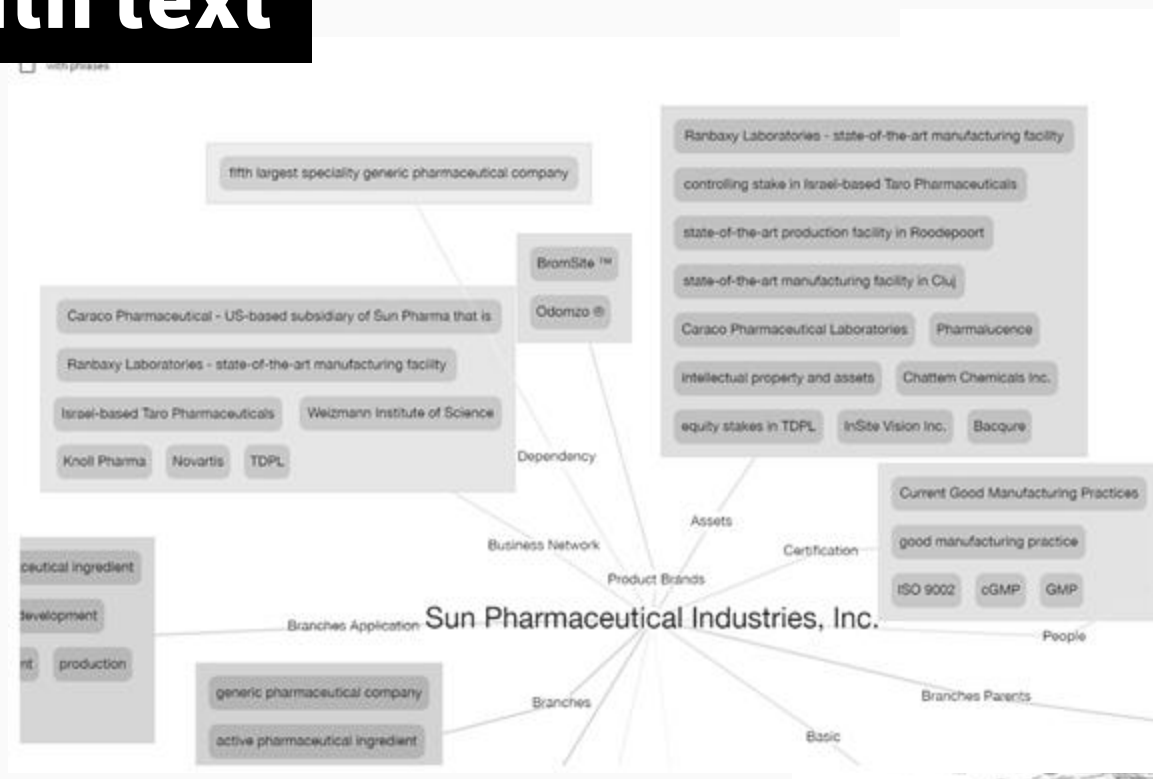

No insurance will cover that. Axa covers Loss or damage to personal effects, valuables and money, but it doesn't cover loss or damage caused by chewing, scratching, tearing or fouling by your domestic animals.

Language Cognitive Engine to automate work with text

10. Limit of things covered
If you or your spouse is perched legally unable to drive following an accident that results in a valid claim under this policy we will, at our discretion, pay for the cost of a rehabilitation driving course.
11. Vehicle Use Exclusion
We will pay an amount representing any assigned part of your vehicle's fee that is included on a payment schedule, if you are otherwise unable to recover this total loss under this policy.
12. Insurance endorsement and assigned equipment
In the event of a total loss, we will pay the actual cash value of the vehicle, less any applicable deductible, at the time of the loss.
13. Personal Injury Protection
We will pay for medical expenses, including reasonable and necessary expenses for transportation, up to the limit of \$10,000 per person per accident.
14. Allowance for Loss of Use
If your vehicle is damaged or destroyed, we will pay for a replacement vehicle of similar make, model and year, or a rental car, for a maximum of 30 days.
15. Other Coverages
This policy may include other coverages such as towing, roadside assistance, and theft of contents.
16. Policy Period
This policy is in effect from 12:01 a.m. on the date of issue until 11:59 p.m. on the date of expiration.
17. Policy Renewal
This policy may be renewed at the discretion of the insurer.
18. Policy Cancellation
This policy may be cancelled by either party for reasons specified in the policy.
19. Policy Assignment
This policy cannot be assigned or transferred to another party.
20. Policy Endorsements
This policy may include endorsements that modify the terms, coverages, amounts, conditions, exclusions, or limitations of this policy.
21. Policy Schedule
This policy includes a schedule of coverages, amounts, conditions, exclusions, and limitations.
22. Policy Definitions
This policy includes definitions for terms used in the policy.
23. Policy Notices
This policy includes provisions for notices and communications.
24. Policy Claims
This policy includes provisions for filing and processing claims.
25. Policy Disputes
This policy includes provisions for resolving disputes.
26. Policy Miscellaneous
This policy includes various other provisions and terms.
27. Policy Entire Agreement
This policy represents the entire agreement between the parties.
28. Policy Governing Law
This policy is governed by the laws of the state of New York.
29. Policy Issuance
This policy is issued by the insurer.
30. Policy Effective Date
This policy becomes effective on the date of issue.

Smabblers Engine- embedded process

Leveraging knowledge from text to feed a workflow, a business process, a system - whatever is needed to achieve a desired outcome | Digitizing and automating processes and workflows

**Building
knowledge**

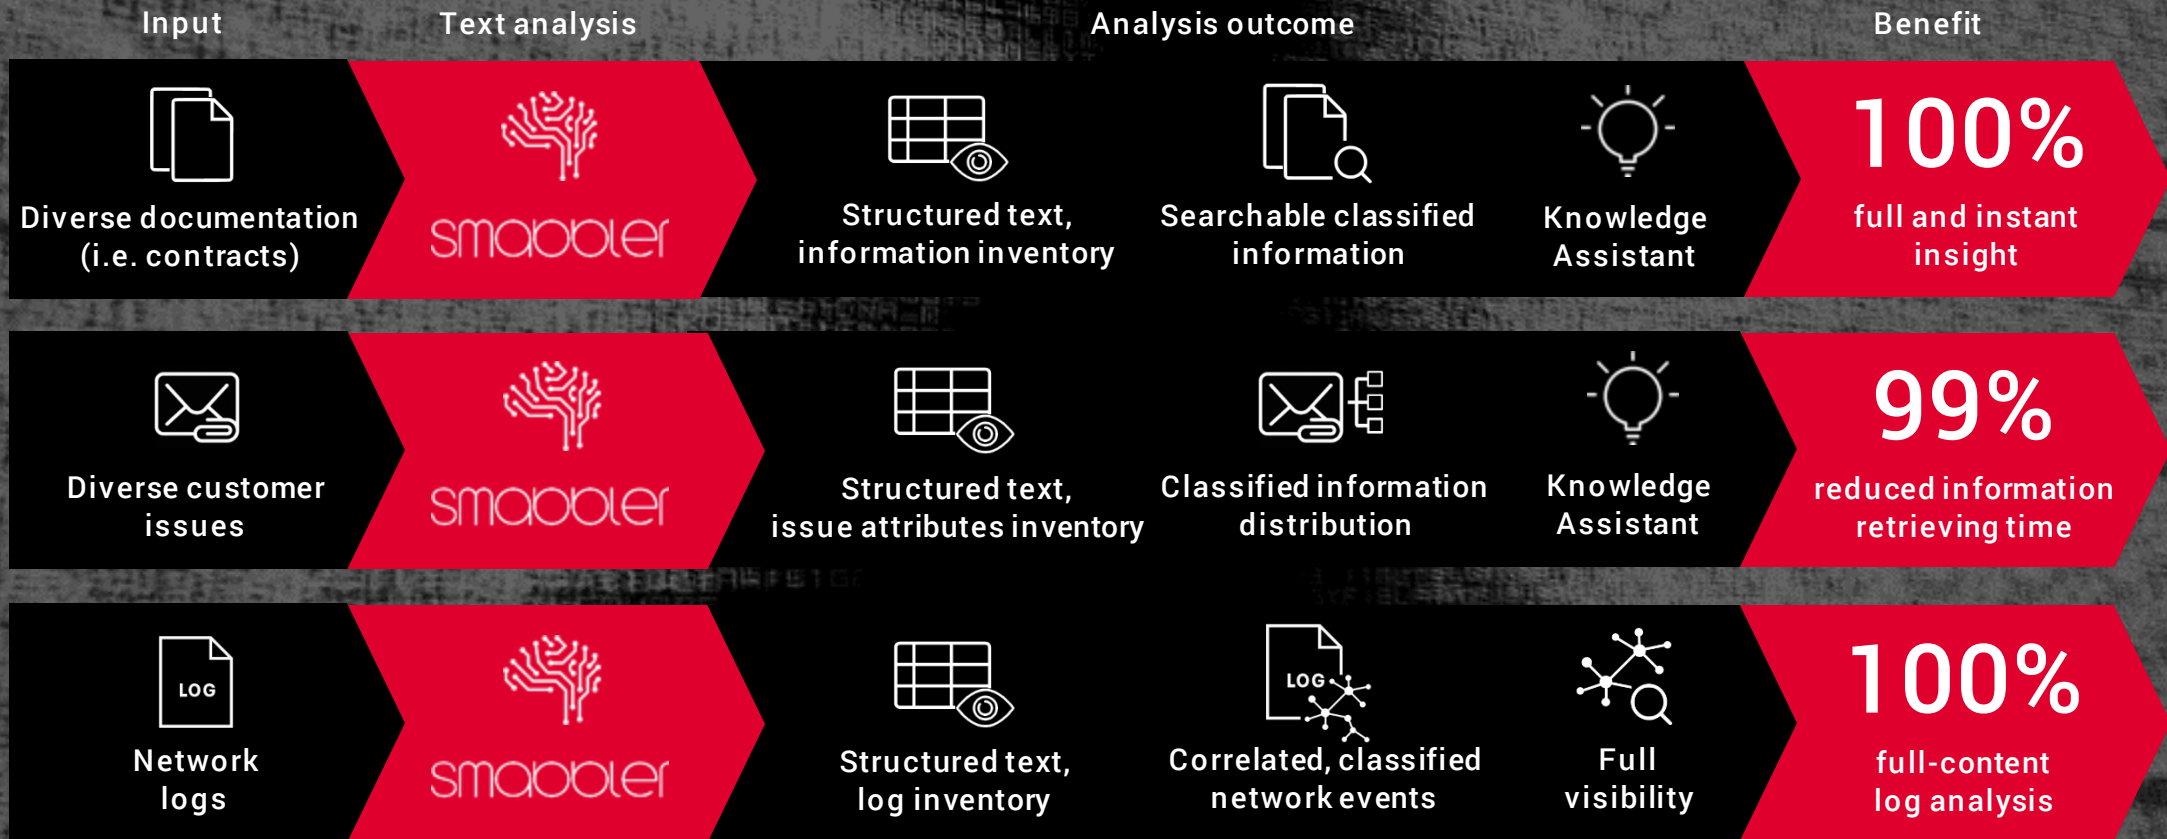

**Retrieving
knowledge**

**Reusing
knowledge**

Applying Smabblers to digitize and automate different workflows and processes

3 example processes

Transformed Experience
Service Excellence

Automated knowledge building through reading

Intelligent context and relations capturing | Automated Taxonomy & Ontology |
Contextual information retrieving | Automated actionable knowledge

Diverse, complex, unstructured,

multidomain or legacy text data

Raw text, emails, websites, documents, PDFs, scans

Automating text cognitive human tasks

Reading and identifying 100% of content | 99% of text processing time reduction | 90%+ out-of-the-box accuracy

Contextual text structuring

Information classification

Document inventoring

Data update for systems

Knowledge assistance for people

Technology snapshot

Language Cognitive Processing

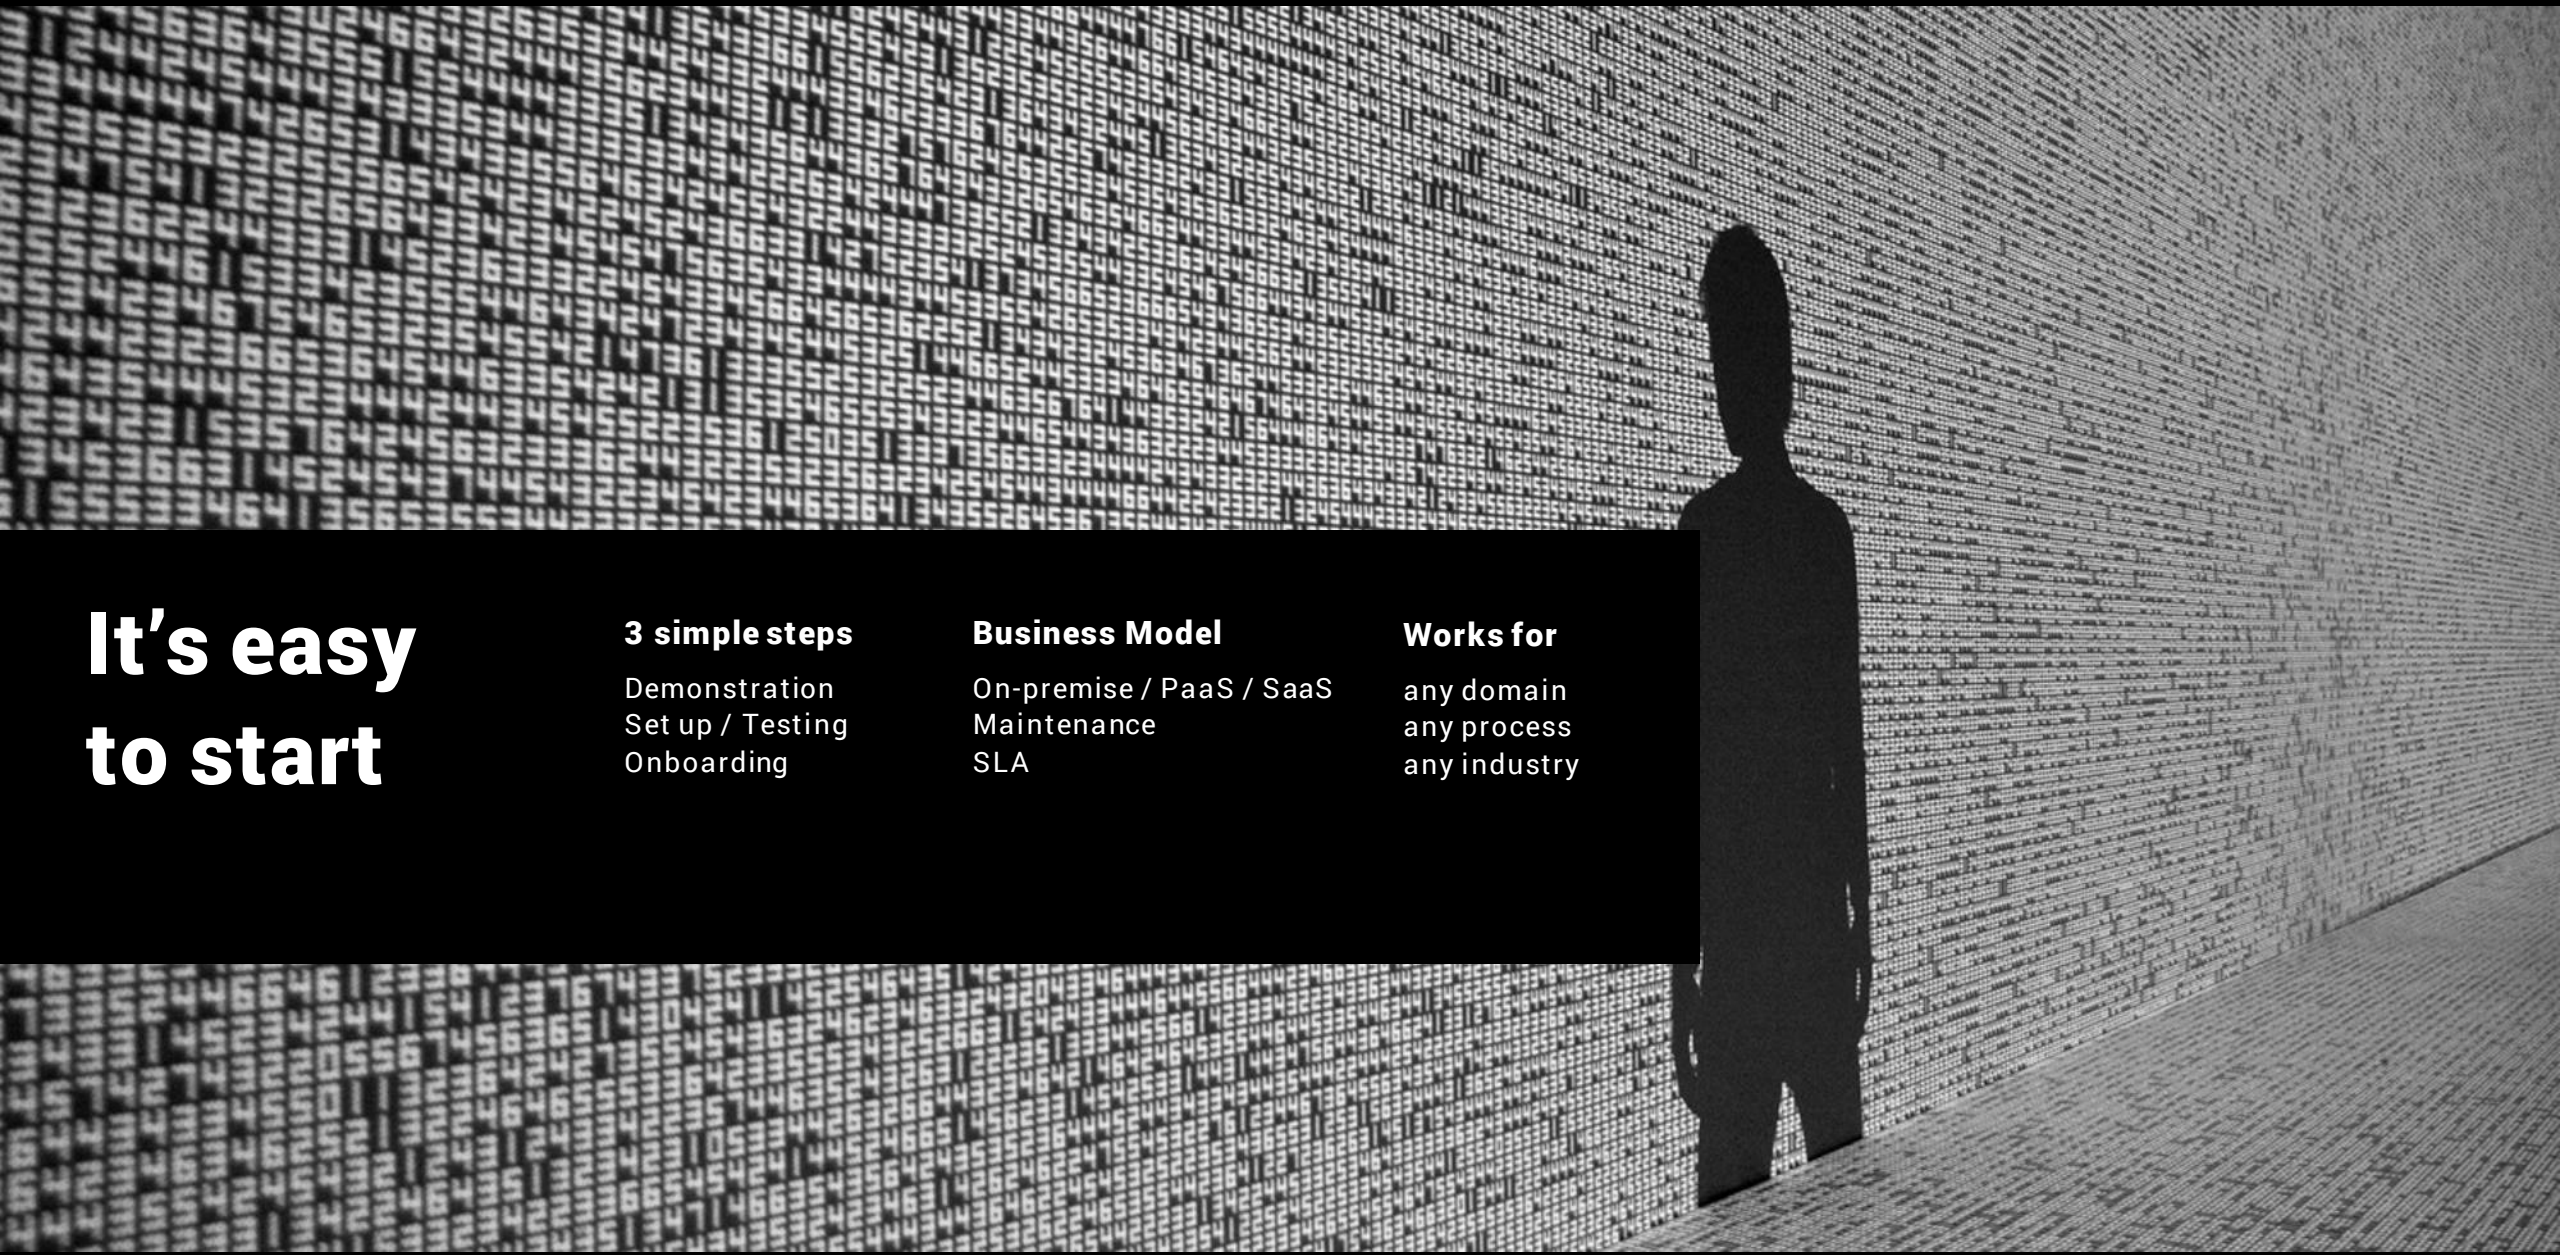

Learning through reading; automated contextual analysis

Automatic Taxonomy and Ontology

Identified relationships between information; organized knowledge

Cognitive Knowledge Network

Automated mapping all relations to cognitive semantic structure

It's easy to start

3 simple steps

- Demonstration
- Set up / Testing
- Onboarding

Business Model

- On-premise / PaaS / SaaS
- Maintenance
- SLA

Works for

- any domain
- any process
- any industry

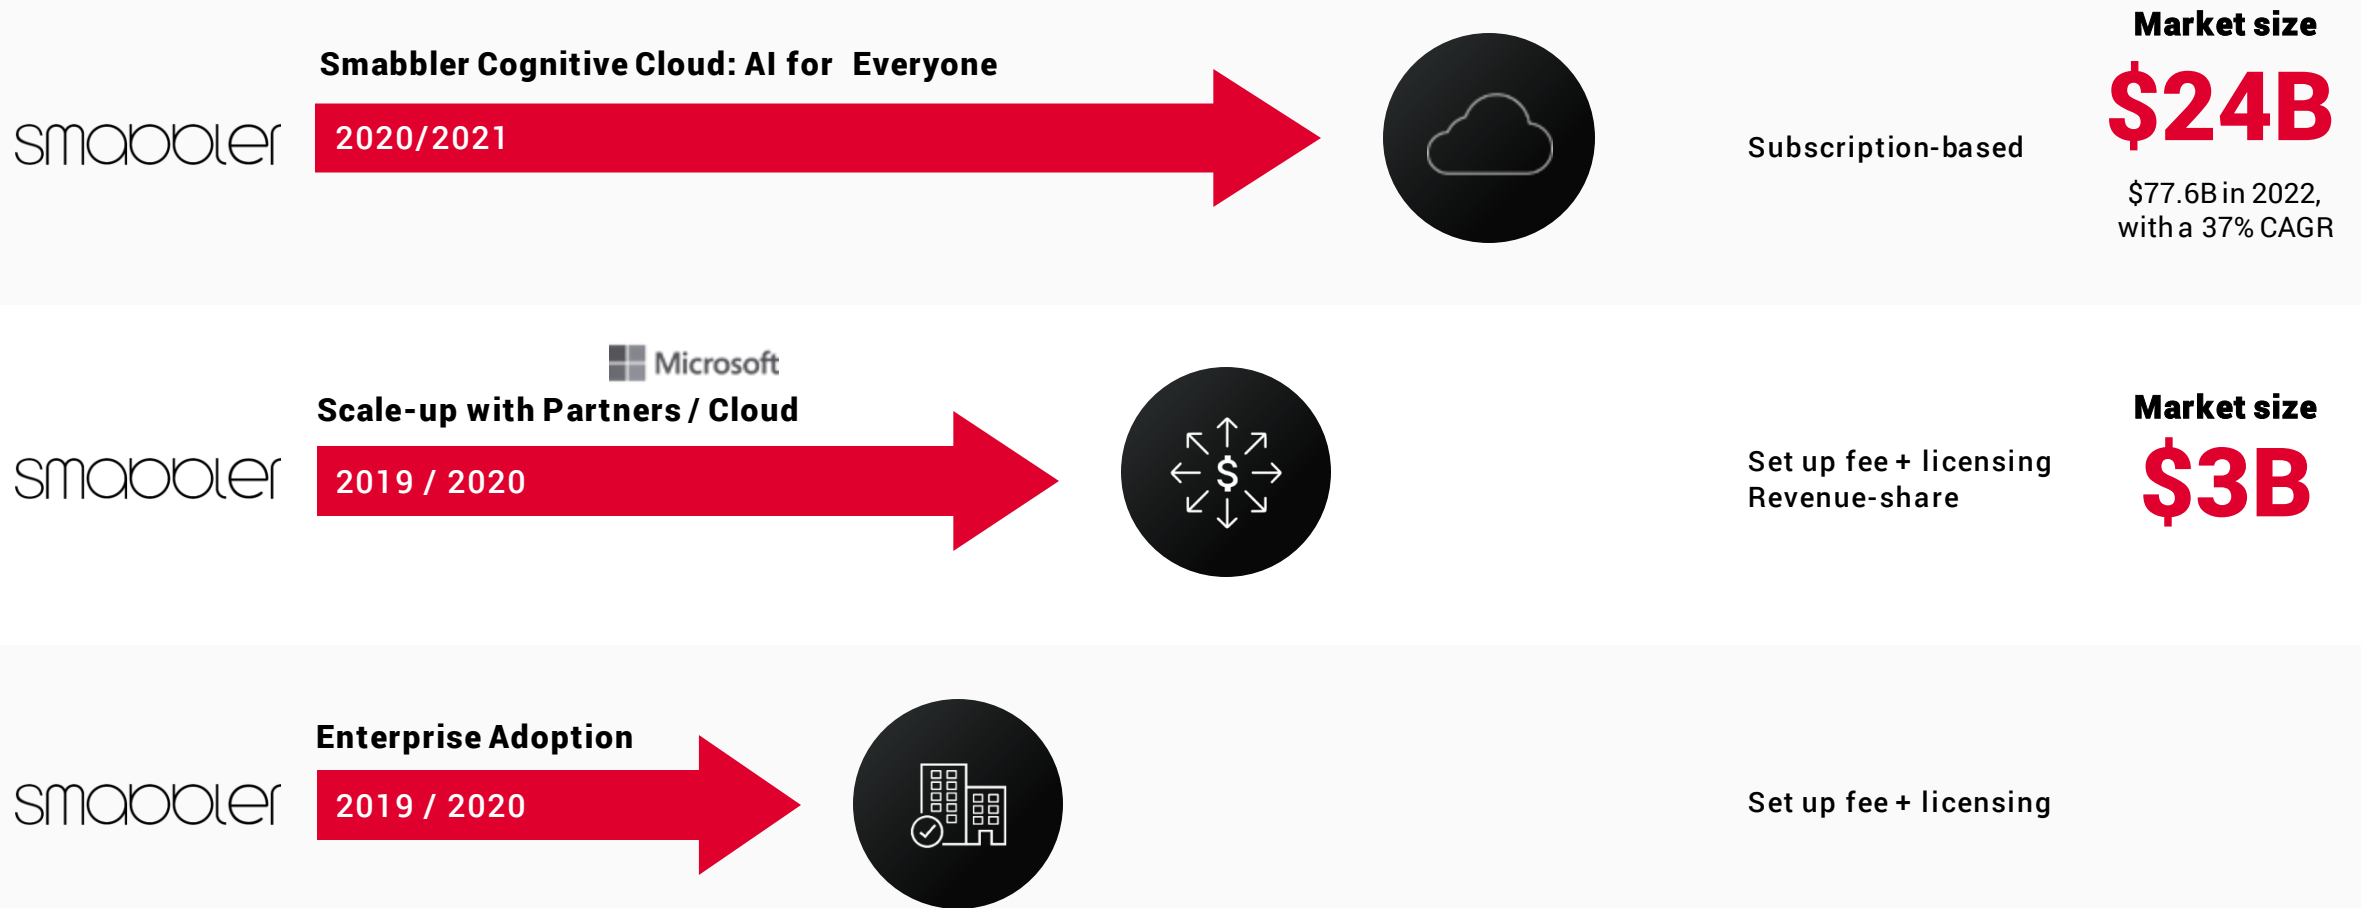

How we differ

smabblar

OTHER SOLUTIONS (market av.)

Solution	Complete solution for business users	Single components for developers
Processes	Multiple	Single
Process readiness	Process-ready / final set-up	Intensive trainings / development
Scalability	High / across systems and processes	Low / labour intensive
Domain range	Multiple Horizontal	Single Vertical
Algorithm approach	Context	Statistics
Training data sets	No	Large
Knowledge	Automatic Taxonomy	Manually built
Data cleaning	Not needed	Needed
Accuracy	90% out-of-the-box	70% approx
Question Answering	Domain-agnostic Defined Q&A data set not required	Narrow domains Defined Q&A data set required

The path to Smabblers Cognitive Cloud

Smabblers Engine business cases

Intelligent text automation
for high volume / high-cost processes

Customer issues handling

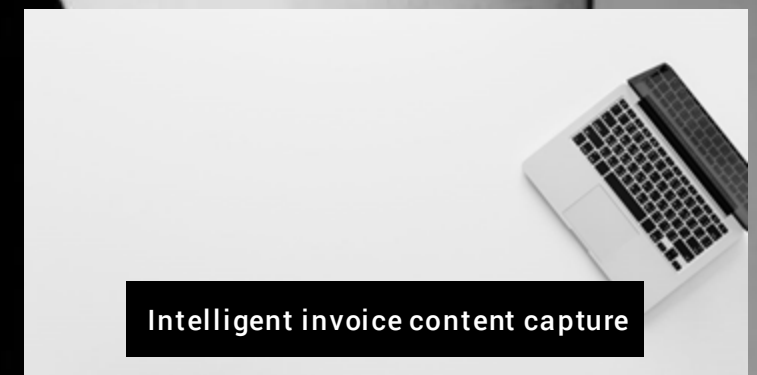

AI Knowledge Assistance

Contract analysis

Intelligent RPA

Intelligent invoice content capture

eDiscovery

Network security

Troubleshooting

Customer issues handling

Smabblar Engine reduces issue processing time by 99%

accelerates service time and lowers customer servicing cost

Emails, attachments, communication forms

Analysis and classification of emails, attachments (PDF, Word, scans, Text), and web form content.

Issue analysis and classification

Diverse and multi-topic issues (claims, requests, complaints, data update, etc.). Extended taxonomy. 90%+ out-of-the-box accuracy.

Extracted attributes, structured knowledge

Data for automating of workflows across existing applications (i.e. skills-based information triggering, specific systems updating).

AI Knowledge Assistance

Task management productivity increased by 55%

More informative decisions and service excellence

Documents / product portfolio analysis

Intelligent information extraction and automated analysis of complex documents and product portfolio.

Automated Knowledge Model

Automated building of Knowledge Model through document and product portfolio analysis. Contextual information mapping.

Instant Knowledge Assistance

Autogenerated knowledge. Support for employees (agents, technicians), customers (Q&A, information suggestions, technical assistance).

Contract analysis

Shortening contract reviewing by 99%

Instant document inventory for audit, due diligence

Ensures contract / policy compliance

Automated contract reading

Analysis of legal contracts in different formats (PDF, Word, scans). Automated reviewing of large document quantities.

Intelligent contract inventory

Identifying and structuring all important attributes and details (contract parties, subject, key provisions, clauses, etc.)

Precise contract reviewing

Classified and structured information ensure instant contract searching, reviewing, or comparing.

Intelligent RPA

Overcoming RPA limitations

for diverse non-repeatable unstructured text data formats

Emails, attachments, communication forms

Analysis and classification of emails, attachments (PDF, Word, scans, Text), web form content.

Issue analysis and classification

Diverse and multi-topic issues (claims, requests, complaints, data update, etc.). Extended taxonomy. 90%+ out-of-the-box accuracy.

Precisely extracted and structured data

Data for RPA to intelligently automate workflows across existing applications (i.e. specific systems updating).

Intelligent invoice content capture

100% of invoice content is recognized and structured

leading to superior data consistency

Diverse invoice processing

Identifying invoice attributes even in non-repeatable invoice formats. Recognizing invoices in incoming emails.

Data capture and structuring

Identifying and structuring all important attributes and details (parties, products, prices, taxes, etc.)

Precisely extracted invoice content

Mapping invoice elements into a structured database. Data is ready for automatic updates of specific systems.

eDiscovery

Proactive information management

to save on expensive manual resources

Documents / emails / websites

Intelligent information extraction and automated analysis of emails, documents, websites, etc.

Building a Business Data Network

Identifying relationships between information. Automated mapping of all relations to cognitive semantic structure to discover new ones.

Information consistency and visibility

Business information are organized and easy to retrieve.

Network security

Full-content contextual log analysis

Early detection of anomalies and malicious activity

preventing attacks, data breaches, or data leaks

Mapping logs into the network structure

Capturing and correlating data from network logs (event ID, description, context, time, etc.). XML, JSON, other formats.

Automated Taxonomy and Relationships

Automated building of log domain taxonomy and Knowledge Model through contextual analysis. Historical logs.

Log analysis, event classification, anomalies detection

Utilizing Knowledge Model and taxonomy for analysis, identification and differentiation of common events, occurring anomalies, root causes.

Troubleshooting

Reducing detection times of painful and costly issues to prevent losses in production, equipment, orders, work time, health; expensive compensations, fines, litigations, damages

Diverse and complex data analysis

Capturing and correlating data from incoming issues, workflows, and technical documentation / product portfolio.

Automated Knowledge Model

Automated building of domain taxonomy and Knowledge Model.

Symptoms identification and classification

Utilizing Knowledge Model and taxonomy for precise identification of symptoms in incoming issues and communication.

**"Because of our product portfolio complexity,
time pressure on Agents
and long list of symptom categories,
we require a unique solution able to work with
diverse, dynamic, and multidomain text data."**

**David, Senior Manager
Global Customer Satisfaction & Quality**
